NEW SCIENCE - REAL DIFFERENCE

What is Vitargo®?

Vitargo® is a patented carbohydrate with unique properties, specially formulated for elite athletes to give an effective loading of easily accessible muscle energy (glycogen) in the body. Vitargo® is a considerably larger carbohydrate than ordinary sports drinks carbohydrates, the molecular structure reminds of glycogen (see table below). Vitargo® has been clinically tested at the Karolinska Institute in Stockholm, and compared with other "ordinary" sport carbohydrate drinks. The results showed that Vitargo® was 70% quicker in replenishing glycogen levels¹ and 80% quicker in passing through the stomach² compared with the normal combinations of complex glucose polymers. For you as a consumer this means faster recovery, no stomach bloating, and the glycogen levels will be replenished in the fastest and most effective way. To preserve the "Vitargo®-effect", it is important not to mix Vitargo® with sugars/ sugar-like carbohydrates (glucose, fructose, maltodextrine). The Vitargo® product line is sugar free. German studies³ clearly demonstrate that a mix of Vitargo® and pure creatine monohydrate increases muscle strength and produces weight gain considerably faster than a regular carbohydrate-creatine mix.

Carbohydrate	Average molecular weight
Vitargo®	500 000-700 000
Starch	> 250 000 000
Maltodextrine	1000-10 000
Dextrose	180

Vitargo Endurance Bar

Vitargo Endurance bar is a musli bar with Vitargo, creatine monohydrate, glutamine and caffeine. Have it along with water or sports drink during for ex. cycling, skiing or as an in-between meal before exercise. Rich in fibers. 1g creatine per bar.
Serving: 65 g Flavour: Crunchy caramel, no coating

Vitargo Performance Bar

This energy bar consists of 26% whey protein and a carbohydrate mix with Vitargo, and you can use it during and after exercise. The bar gives you the extra energy to recover after a training session.
Serving: 65 g Flavour: Vanilla with yoghurt coating

Vitargo Protein Bar

A mix of carbohydrates and Vitargo and 20 g pure protein per bar (whey, milkprotein and caseine) will give your body perfect ingredients for muscle recovery. Wonderful flavour!
Serving: 65 g Flavour: Milk chocolate with chocolate coating

CARBOHYDRATE SUPPLEMENTS

1 portion of Vitargo is equal to approximately 3 portions of cooked pasta!

Vitargo Carboloader / +Electrolyte / PURE Vitargo

The unique properties of Vitargo®, gives you the opportunity to perform at your maximum level in extreme endurance sports as well as at the gym. The positive effects of Vitargo® is well documented. The carbohydrate is easy accessible to the muscles, and compared to other common combinations of nutritional carbohydrates, Vitargo® replenishes glycogen levels 70% quicker. Vitargo® is available with and without added flavours and minerals. No sugars added!

Vitargo Carboloader (orange), 75 g sachet, 2 kg- or 5 kg plastic container. No minerals added.
Vitargo+Electrolyte (citrus or pink grape), 70 g sachet, 2 kg- or 5 kg plastic container. Minerals added.
Vitargo PURE Vitargo (natural), 2 kg- or 5 kg plastic container. No minerals or flavour added.

PERFORMANCE BOOSTER

Vitargo Professional

A combination of Vitargo and BCAA's (5,5 g/100 g powder) and caffeine (218 mg/100 g powder) to enhance performance and stamina. Improves mental performance and suppresses fatigue. Mineralised.

Vitargo® Professional (citrus), 2 kg plastic container. Minerals added.

CARBOHYDRATE SUPPLEMENTS

Vitargo Gainers Gold

To benefit muscle gain and recovery, we have an optimised carbohydrate-protein formula with Vitargo® Gainers Gold. This is a combination of first class proteins (whey protein, milk protein isolate, glutamine peptide and alpha-lactalbumin) and Vitargo®. Helps your body in the most effective way, to prevent infections and overtraining. For usage immediately after exercise as a recovery drink or as an in-between meal, to give extra energy during the day. Ratio Vitargo®:protein (2:1). No sugars added!

Vitargo® Gainers Gold (chocolate or strawberry), 75 g sachet and 2 kg container. Minerals added.

GAIN STRENGTH / PERFORMANCE BOOSTER

Vitargo +Creatine

Ever tried CREAPURE® creatine monohydrate? In combination with Vitargo® it is even more effective. Vitargo® helps the creatine transport into the muscle tissue, and at the same time effects your stamina and recovery during and after the exercise bouts. Vitargo® +Creatine makes you stronger and your muscles more explosive. German studies³ (see diagram) showed increase in strength, weight gain and muscular volume when using the same formula as Vitargo® +Creatine. 8,75 g pure creatine per 100 g powder. No sugars added!

Vitargo® +Creatine (orange), 2 kg plastic container. Minerals added.
