

# ALUULA Graflyte™

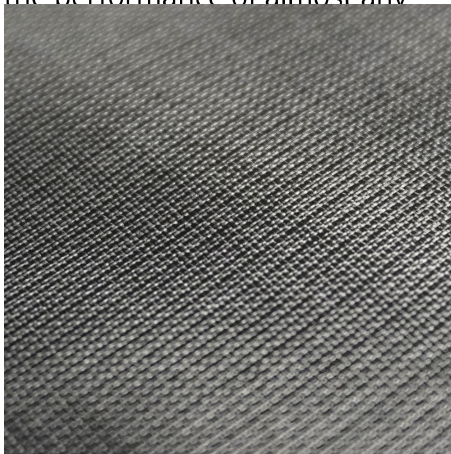

Ultralight, waterproof and durable.  
There's nothing else like it.

The fusion of our new V-film to the ALUULA Core™ without the use of glue has created a new generation of ultralight fabrics that are 100% waterproof and non-air-permeable. Whether you're seam taping a backpack or welding an inflatable tube, the lower melt temperature makes bonding faster and more consistent.

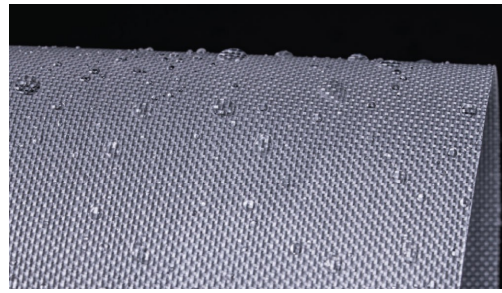

**Strength meets softness.**

With eight times the strength-to-weight ratio of steel and a soft nylon feel, Graflyte dramatically improves the performance of almost any

**Graflyte V-52**

Weight: 52 gsm

**Waterproof and airtight.**

Whether you want a backpack that can withstand monsoon downpours or an inflatable that can take a beating, the durability of Graflyte is
